B8310: Advance International Corporate Finance
Fall 2014

Professor Robert J. Hodrick
Office: 414 Uris Hall; 212-854-3413; rh169@columbia.edu
Office Hours: Tuesday, 1:00 - 2:00; Thursday, 10:45-11:45; or by appointment
Teaching Assistant: Andrea Kiguel, andrea.kiguel@gmail.com

The course examines important issues in international corporate finance using a mixture of classes involving lecture/discussion and the analysis of cases. After a review of international finance fundamentals, considerable time is devoted to international capital budgeting decisions, which require an understanding of exchange rates and the determination of an appropriate cost of capital. These issues are examined as they arise in the valuation of direct foreign investments, in leveraged buyouts, in initial public offerings, in equity carve outs and in international mergers and acquisitions. Many of the cases involve corporations in emerging markets where issues of political risk arise. The course also analyzes the determination and management of foreign exchange risks of various types. The cases include discussions of the use of foreign currency forwards, options, and swaps and their appropriate use in risk management. The course concludes with an analysis of the financing of large projects in developing markets.

Students should have taken B8306 - Capital Markets and Investments or its equivalent prior to enrolling in the course.

Course Requirements:

Your grade will be based on the following requirements:

Five Group Executive Memorandums: 75%; Class Participation: 25%

You are expected to participate as an equal partner in your group, which can have as few as three and as many as five members. In the last class, I will ask all group members for a private report that allocates the percentage share of work that they think each member did, including themselves.

Note on Executive Memorandums:

The due dates for the assignments are listed on the schedule. Executive Memorandums are limited to three pages (typed, double spaced, minimum 11 point font). The first three pages must contain your entire case discussion. Supporting data, tables, or graphs can be included at the back of the memo in technical appendices. Papers are due at the beginning of the assigned class period. You should write the case solutions as if you are reporting to a senior person in your firm. It won’t be long before you are doing this in reality.
Honor Code Considerations:

The Executive Memorandums are to be done with your group members only. Do not share your analysis of the cases with other groups. Each group must develop and analyze its own spreadsheets and produce an independent write-up.

Schedule

Readings marked with an asterisk (*) are supplemental and are not required.

I. Introduction to Foreign Exchange Markets and Transaction Exchange Risk

Class 1, Tuesday, September 2: Spot and Forward Foreign Exchange Markets, Transaction Exchange Risks, and Interest Rate Parity

Bekaert and Hodrick, Chapter 2, The Foreign Exchange Market
