Required Materials

- Course Pack (cases and additional readings), Hand-outs on CANVAS.
- Bruce Greenwald and Judd Kahn (2005): *Competition Demystified (CD)*.

B. Course Description

This course examines the underlying economics of successful business strategy, including

(i) The sources of long-run competitive advantage.
(ii) The dynamics of competition and competitive advantage.
(iii) Strategic interactions (competitive and/or cooperative) between pairs of firms.

Three characteristics distinguish our approach. First, we focus on the large strategic decisions which firms face rather than more detailed, operation/managerial issues. Second, we seek broad principles that can be applied across many firms and markets, rather than anecdotal success stories or institutional details that apply only in limited cases or as a result of quite idiosyncratic factors. Finally, we develop these broad principles from the framework of microeconomic theory. As such, potential answers will be subjected to the rigor of economic analysis to test their validity and applicability.

The approach toward teaching and learning is primarily inductive. That is, you will learn the concepts and principles outlined above largely through examples – this is the essence of the case study method. The goal is to carefully study specific business situations and decisions with the goal of extracting broader principles about business strategy, which will then be
available to you in a wide variety of managerial contexts. Course time will be split roughly 65/35 between case discussions and lectures.

Good cases are necessarily complex and ambiguous. In preparing for case discussions, you may find sorting through this complexity and ambiguity to be frustrating. The problems presented in the case discussion may not have one correct answer. However, there will generally be a set of insights and solutions that are better than others. And it is in working through the messy details to find these insights and solutions – both in your own preparation and in class discussion – that the concepts and principles introduced in the readings and lectures will come alive and be enriched for you.

C. REQUIRED PREREQUISITES AND CONNECTION TO THE CORE.

The learning in this course will utilize, build on and extend concepts covered in the following core courses:

<table>
<thead>
<tr>
<th>Core Course</th>
<th>Connection with Core</th>
</tr>
</thead>
<tbody>
<tr>
<td>Managerial Economics</td>
<td>1. Understanding market competition and equilibrium thinking (in the short-run).</td>
</tr>
<tr>
<td></td>
<td>2. Market equilibrium thinking (in the long-run) and barriers to entry.</td>
</tr>
<tr>
<td></td>
<td>4. Pricing with market power.</td>
</tr>
<tr>
<td>Strategy Formulation</td>
<td>1. Creation of value vs. value capture</td>
</tr>
<tr>
<td></td>
<td>2. Competing firms.</td>
</tr>
</tbody>
</table>

Students will be expected to have mastered these concepts and be able to apply them in the course.

D. CLASS SCHEDULE

I. Sources and Dynamics of Competitive Advantage.

The first part of the course is focused on understanding the sources and dynamics of competitive advantages. It presents a simplified approach to business strategy, based on the notion that any *long-run competitive advantage* must rely on “barriers to entry”. Firms without competitive advantages should concentrate all their efforts on being efficient. Firms that do have competitive advantages need to design strategy with their competitors in mind.
II. Shared Competitive Advantages: Managing Strategic Interactions.

After having developed the basic tools for the analysis of competitive advantage, we will use game theory as a framework for analyzing “shared competitive advantages”. The basic issue is simply this – when competitive advantage is shared with other firms, any action I take will elicit a reaction by my competitors. How can I incorporate those reactions in forming strategies so that I am not blindsided, and if possible, can even use them to my advantage? Can I find a way to move away from mutually destructive price competition, toward win-win games? How do I enter an industry, or avoid entry by new competitors? How do I structure and manage my relationship with suppliers and complementors?

</table>

* Cases: Require advance reading and completion of an online case quiz prior to class. Case preparation questions can be found at the end of the syllabus.
E. Course Requirements and Grading  *(Preliminary and Subject To Change)*

Grading will be based on (1) On-line case quizzes, (2) Class Participation and (3) a final group project to be submitted by *Saturday June 2nd at Noon*.

1) **On-line Quizzes** *(15% - Individual/Type B)*

For each starred case, there will be an *online quiz*, to be taken *prior to 9am the day of class*. Questions are multiple choice and/or require you to write a paragraph justifying your answer. Grading is based on the *thoughtful completion* of each of the quizzes. Be also prepared to discuss your answers in class.

2) **Class Participation** *(25% - Individual/Type B)*

Class participation is essential in order for you to get the maximum benefit from the course. Your grade will be based on attendance, effort and the content of your contributions to the class discussions. The evaluation of content will be based on the following:

- **Relevance**: Are your comments clearly related to the case and to the comments of others? Do they move the discussion forward?
- **Fact-Based**: Have you used specific data from the case, from readings, or from personal experience to support the assertions that you are making?

Case discussion constitutes more than half the class time, so there will be ample opportunity for each of you to participate. If you feel that you are preparing well but that I am not calling on you enough, please let me know so that I can address the problem. In addition to voluntary participation, *I often randomly select a few students to open and/or lead the case discussion.*

Importantly, I ask that you deal with the cases as you find them; *do not seek outside or post-case data on the firm or industry*. Of course, if you already know things about the case, from previous experience, this can be very useful in case discussions. Please let me know about it in advance, and I will make a point to call on you at the appropriate time.

3) **Final Group Project** *(60% - Group/Type A)*

Analyze a company or industry, ideally focused on a particular strategic decision (or set of strategic decisions) by that company or the players in that industry. The main goal of the exercise is to make you think carefully about applying the concepts of “The Economics of Strategic Behavior”. *You can work in groups of two to four people.* *No individual papers, and no groups of 5 people will be allowed.*
You should try to pick something creative, enlightening, and somewhat complex. Industries with a small number of firms are a good place to start. Try to have at least one “insider source” (somebody who works or has worked in that industry or company). Some research on the details is essential, but the key to a successful paper is to analyze, not just describe. Finally, do not base your paper on a case you discussed in one of your classes at CBS or on a previous paper you wrote (in case of doubt, contact me first.) Suggested length is between 10 and 12 pages double-spaced (that would be between 3500 and 4000 words). You may include as many relevant exhibits as you wish (not counted in the page total). Be sure to include references. A number of final papers of previous years will be posted online.

**Due Date:** Saturday June 8th at Noon. (DROPBOX CANVAS).

**Preparation Questions (be prepared to discuss these questions in class)**

**Enterprise Rent-a-Car**
1. How attractive is the car rental industry in terms of long-term profitability?
2. Analyze Enterprise’s strategy and competitive position. Why has Enterprise been so successful?
3. Should Hertz or Avis launch a frontal assault on Enterprise?

**Aldi: The Dark Horse Discounter**
Aldi, the German-based hard discounter, has ambitious growth plans for the US market.
1. Discuss the main elements/choices of Aldi’s strategy. Does this strategy result in a cost advantage in the discount grocery segment relative to Walmart?
2. Does Aldi have a (sustainable) competitive advantage in the US? Yes or no?
3. How should Walmart react to Aldi’s expansion? Should they imitate some of the key choices of Aldi’s? Should they go to a price war to stop Aldi’s expansion?

**Capital One**
1. What, if any, competitive advantages does Capital One have?
2. Are these advantages sustainable into the future?
3. As head of Capital One, what would be your strategic priorities?

**The Economist**
1. What explains the success of The Economist thus far? Why has it managed to succeed while so many other magazines are struggling?
2. What should Andrew Rashbass’ major priorities be going forward? What opportunities can the Economist take advantage of, and what threats should they be sensitive to?

3. Is Mass Intelligence a real business opportunity?

**Microsoft’s Search**

1. What, if any, competitive advantages does Google enjoy in search. Are these competitive advantages sustainable?

2. Does Microsoft have a competitive advantage in search? What market share do they need to be profitable? Do you think they will be successful?

3. How should Google respond to Microsoft?

**Setting Strategy at S Group**

1. Describe S Group’s strategy in 2017. How does its approach result in lower costs and/or higher willingness-to-pay for S Group versus competitors (i.e., Kesko, Lidl)?

2. How concerned should S Group be about Amazon’s expansion in Europe? What actions can S Group undertake in anticipation of Amazon’s expansion in Finland?

3. Which of the following options is S Group’s best path forward to pursue growth, increase scale, and secure long-term success?
   - Solidify and increase S Group’s market share in groceries, through “cheapifying” superior logistics and data-driven analytics.
   - Become Finland’s e-commerce leader (in both groceries and consumer goods).
   - Further diversification in other lines of business (e.g., travel, banks, restaurants, etc.), allowing members to use the S-Etukortti bonus card in larger networks of stores and businesses.
   - International expansion.

4. How should S Group proceed in monetizing its unique data on S-group members?

**Tesla Motors.** Tesla Motors attempts to become the first US firm since WWII to successfully enter the car industry with a mass-produced car.

1. Should BMW expect Tesla to grow into a strong direct competitor like Audi (versus Tesla being either limited to a niche or a flash in the pan)? Is Tesla at a competitive advantage or disadvantage? How will that evolve?

2. What do you think of Tesla’s entry strategy? What barriers did it have to overcome? How did it manage to do so? Will other firms follow in Tesla’s footsteps?
3. How do you expect the industry to evolve?

**Philip Morris: Marlboro Friday**
1. How would you describe Marlboro’s competitive position in early 1993?
2. What accounts for Philip Morris’ dramatic shift in strategy in April 1993? What are its goals?
3. How should RJ Reynolds respond?
4. What kind of industry future does Philip Morris anticipate?

**Pratt & Whitney: This Changes Everything.**
1. Should Pratt & Whitney go ahead with the GTF? Or, was the decision made by previous management to pull back from new engine programs the right one? What criteria should PW apply for this decision?
2. Assume PW has decided to go ahead with the GTF technology, how should it proceed?
   a. Focus on the Airbus A320neo, despite non-exclusivity and projected rivalry with GE who will also deliver an engine for this plane.
   b. Focus on the Embraer and/or Bombardier plane. PW must first develop the engineering capability before attempting to do something like the Airbus A320neo. These programs also involve less competitive risk as PW would be the only engine option.
   c. PW has a winning engine technology-- it should bid for all three engine programs

**Ready-to-Eat Breakfast Cereal Industry**
1. Why has RTE cereal been such a profitable business?
2. How have the incumbent brands managed rivalry?
3. And how has entry been avoided for such a long time?
4. How should RTE cereal producers react to non-branded entry?

**Dogfight over Europe: Ryanair (A)**
1. Describe Ryan Air’s entry strategy.
2. Evaluate Ryan Air’s entry strategy. Will it succeed?
3. Place yourself in the shoes of the CEO of BA or AL. How would you respond to Ryan Air’s entry?
Red Bull
1. At the time Red Bull entered the US market, would Coke have been at a competitive advantage if it had attacked Red Bull? If so, what were its sources of advantage? Why didn't it attack aggressively?

2. Is there anything that Coke or Red Bull should have done differently?

3. How was Monster Drinks able to catch up with Red Bull? Why didn't Red Bull react more aggressively? Should Red Bull or Monster have done things differently?

Nintendo
1. Nintendo successfully recreated the home video game business following the Atari-era boom and bust. How did it do so?

2. How did Nintendo capture value from the home video game business? How did it avoid that “content” developers (such as Electronic Arts), or distribution channels (such as Wal-Mart, ToysRUs) captured all the rents?
